

## Slot Machine Game Profile

Let's Play

The information in this Slot Machine Game Profile is in addition to information found in the Casino Gaming Guide. The Guide and Profile are free and available at all casinos in British Columbia, or by visiting our Web site [www.bclc.com](http://www.bclc.com).

### **How to Play**

Playing is simple. Slot machines in British Columbia can be played using 25¢, \$1 or \$2 coins. For added convenience, bill acceptors can be used that accept \$5, \$10, \$20, \$50 or \$100 bills in Canadian funds.

Be sure to look for the “Credits” indicator on the slot machine. This indicator shows the number of credits you may play.

Then the fun begins. You may start playing by pulling down and releasing the arm on the side of the slot, or by pressing the “Spin Reel” button.

All slot machines display the number of credits won, based upon the results of the reel spin.

Slot machines in British Columbia casinos offer a variety of ways to play. You can choose from wagering on one-line, two-line, or multiple-line outcomes on the slot reels.

Approximately 90% of the coin played on British Columbia slot machines is returned to the players. However, individual player experiences will vary.

### **Randomness**

By referring to the odds tables in this Profile, you can see that on all games, the odds of winning smaller prizes are much greater than the odds of winning the top prize in any given game. The odds to win may vary if fewer than maximum coins are played. Please refer to this table for specific information on various slot machines.

Slot machines operate randomly at all times no matter how many wins or losses have occurred in the past. A machine that has not paid out for some time has no greater chance of paying out in the future. In other words, the result of your last game has no bearing on the result of your next game.

The result of each game is entirely random, and is not affected by altering play patterns, time of day or position of the machine within the facility. No matter what you do, or what is going on around you, the slot machine’s computer is continually generating random combinations. Each time you play the slot machine, it stops on a random combination and displays the result. The next time you play, it repeats this process.

The outcome is random, every time you play.

**5¢ GAMES**

5¢ games accept only 25¢ coins and higher denominations. One credit equals 5¢.

Manufacturer	Game	Odds to win any	Odds to win top	Top prizes available based on number of coins played.
